

STANDARD DRYING METHODS **ARE CHANGING EVERY DAY!**

The IICRC has found Directed Heat Drying
Such an important breakthrough in Restoration
That they are including Thermal Drying in the
Latest edition of the IICRC S500
Standard and Reference Guide
for Water Damage Restoration.

Diamond Restoration is inviting you to attend
FREE 8 Credit Continuing Education Workshop

On the application of directed heat and
Thermal Drying.

“Desert Dry in record time!”

November 17th & 18th

9:00 a.m. to 1:00 p.m.

4 Lewis Circle, Wilmington DE 19804

Lewis Commercial Center

(next to Delaware Military Academy)

Day One

We will discuss typical classifications of water losses and how to approach each claim with the proper equipment to best minimize costs, time and headaches.

See first hand the different forms of extraction and which one is best

For different situations. We'll then move into the science behind Thermal Drying
And how this has evolved into one of the best tools to properly handle a water loss.

We will then flood our State-of-the-Art Flood House and provide a hands-on
Demonstration of proper extraction techniques for carpet, tile, and hardwood floors, and
set up the Thermal Drying Equipment to begin the drying process.

We invite you to stay for lunch immediately following.

Day Two

Witness the progress as the drying comes to a completion. See for yourself
The cost effective advantages of using Thermal Drying. In a normal water loss, you were
faced with removing the padding, drywall, insulation, base trim and possibly even
cabinets, only to be followed by costly replacement of these items and repainting the
affected area. These costly items are a thing of the past using Thermal Drying!

Stay ahead of your competition
and learn the latest techniques to help your clients.

Remember.....

If you solve the same problem as your competition, one of you isn't needed.
If you solve more problems than your competition,
Your value to your client multiplies!

Please RSVP no later than Monday, November 15th, as the classes fill quickly. The response form is below. Feel free to call, fax or email us with your response. We look forward to seeing you! Fax # 302-995-1585

*Cost: Free

**Diamond Restoration, Inc.
Thermal Drying Demonstration**

Thank you for coming to our class on November 17th & November 18th. Dress is casual, keep in mind your shoes may get a little wet. **If you have any questions, please call Leah Walker at 302-995-1580.** We look forward to seeing you here!

Please fill out completely and use a separate sheet for each attendee.
